PROFILE

Final-year Computer Science student with experience building scalable backend systems, AI-powered enterprise applications, and cloud-native software. Worked across full-stack development, business intelligence, distributed systems, and large-scale data engineering handling over 160 million records. Passionate about Software Engineering, AI, Cloud Infrastructure, DevOps, and building production-grade applications with modern technologies.

EXPERIENCE

Biocipher Technologies

Apr 2026 – Aug 2026

Associate Executive Intern (Software Engineering)

Gurugram, India

- Developed AI-powered business intelligence and large-scale data processing solutions for over 160 million customer records, increasing profitability by 18% across the company's financial services
- Designed and integrated scalable enterprise applications using Next.js, TypeScript, Python, DuckDB, and AI/ML workflows to automate data processing, analytics, and organization-wide insight sharing
- Engineered CRM integrations consolidating multiple business services while streamlining digital marketing and operational workflows for improved efficiency and revenue growth
- Tested, optimized, and documented AI-powered Voice, SMS, Email, and WhatsApp communication modules, enhancing platform reliability and creating technical training resources for AI automation agents.

Dadata Consulting

Jan 2026 – Feb 2026

Associate Software Engineer Intern

US-based company | Remote

- Delivered end-to-end metadata and lineage migration into Collibra DGC for a US enterprise client
- Built Spring Boot middleware to parse Alteryx workflows and publish assets via Collibra REST APIs
- Automated technical lineage ingestion using Python and Collibra Edge Lineage Harvester

BuziBrAlns

Jul 2025 – Oct 2025

Software Development Engineer Intern

Bengaluru-based company | Remote

- Built production-ready ERP and CRM solutions by translating business requirements into scalable software features.
- Automated enterprise workflows using full-stack technologies, improving operational efficiency and reducing manual processes.

PROJECTS

Enterprise Food Delivery Microservices Platform | *Spring Boot, Spring Cloud, Spring Security, MySQL* | [Link](#)

- Designed a distributed food delivery system using Spring Cloud microservices
- Implemented service discovery, API gateway routing, centralized config, and authentication

Developer Snippet Vault | *React, MongoDB, Node.js, Express, Tailwind* | [Link](#) | [View](#)

- Developed a full-stack developer tool for storing, searching, and managing reusable code snippets with REST APIs and a responsive, modern UI.

BankLanding Page | *React, Tailwind, JavaScript, HTML, CSS, Figma* | [Link](#) | [View](#)

- Built a modern, fully responsive banking landing page using React.js and Tailwind CSS, ensuring seamless user experience across devices.

SKILLS

Languages : Java, Python, Typescript, JavaScript, SQL, HTML/CSS

Frameworks : Spring Boot, Spring Cloud, React, Node.js, Express, Hibernate, JUnit

Tools : Git, Postman, Collibra, Linux (Ubuntu), Unix shell, Bash scripting, AWS (EC2, ECS, S3, Lambda, etc), Docker, CI/CD fundamentals

Databases : MySQL, PostgreSQL, MongoDB

Concepts : Microservices, REST APIs, Data Governance, AI/ML, Cloud Computing, SDLC, Cyber Security

AI Engineering : LLMs, AI Agents, Prompt Engineering, RAG, MCP, AI Workflow Automation

AI Tools : Claude Code, ChatGPT, Gemini, Cursor, GitHub Copilot

EDUCATION

The NorthCap University

B.Tech in Computer Science and Engineering | CGPA: 8.77

2022 – 2026

Gurugram, India
